**Intermap Technologies, Inc.**

8310 S. Valley Hwy, # 400  
 Englewood, CO 80112  
 United States  
[www.intermap.com](http://www.intermap.com)

**Interferometric (IP) Technicians**

**Intermap Technologies** is a dynamic world leader in geospatial data acquisitions. That means that we fly airplanes, using radar, and gather data to create highly accurate maps. This data is now being used to SAVE LIVES and IMPROVE the Environment! We're growing and in need of people who can think fast, react faster, and who love working in a global environment.

(NO RELOCATION PROVIDED--LOCAL Candidates preferred)

**IP Technicians (Interferometric Processing)**

**Job Summary and Duties:**

**Job Duties:**

Using proprietary software, this candidate will be responsible for processing, calibrating, QCing and delivering finalized map sheets to the Intermap edit department.

- ▶ Collect and organize all information that will be needed for processing new projects.
- ▶ Create and maintain project books in accordance with ISO process.
- ▶ Start, monitor and QC pass processing.
- ▶ Document and repair any problems within the data.
- ▶ Use ground control and differential profiles to calibrate data.
- ▶ Analyzing results and assures data meets specifications.
- ▶ Monitoring/investigating/fixing any failures in the processing system.
- ▶ Report and document critical choices and problem to supervisor
- ▶ Prepare and ship data.
- ▶ Repair and document any rejected data.

**Job Requirements**

- ▶ Have a good basic knowledge of either, or both, Windows and Unix operating systems.
- ▶ Comprehend map data presentation and the relationships between map features and their portrayal at different scales
- ▶ Demonstrate flexibility in moving between different technical roles within the company / team.
- ▶ Be capable of working alone on assignments or as part of a larger team.
- ▶ Demonstrate the ability to plan, manage and execute project task in accordance to the delivery schedule.
- ▶ Be capable of understanding the technical aspects of the Intermap Processing procedure documentation, and applying the requirements for approach, specification, quality checks etc. Identified in the documentation.
- ▶ Have a strong, self motivated, work ethic which promotes teamwork as well as a positive attitude in the work place.
- ▶ Display an attention to detail approach to task accomplishment with strict procedural compliance philosophy.

**Working Conditions**

- ▶ Candidate may be asked to work overtime on occasion to fulfill project schedule requirements.

Work Authorization :	• Authorized to work

**Intermap Technologies, Inc. Profile:**

Intermap Technologies is a GIS/geospatial leader with the commercial capacity to meet world demand for highly-accurate, low-cost digital elevation models. These include digital surface models and digital terrain models, as well as cartographic products vital to producing accurate base maps that drive a proliferation of GIS, GPS and 3D visualization applications.

Working for governments and private industry worldwide, Intermap collects data with its airborne interferometric synthetic aperture radar (InSAR). These systems, mounted on airborne platforms, enable the Company to map large areas accurately, quickly and in overcast or dark conditions. We generate our products in highly automated facilities in Munich; Denver, Calgary, Ottawa and Jakarta. Thanks to our new business model, NEXTMap®, mapping entire countries, the company is currently in a state of rapid development while remapping the world
